

Título	Autor	Director
Sandra Gómez Rodríguez	Two-Dimensional spectroscopy of coupled nuclear and electronic motion.	Ignacio R. Solá
Uxía C. Rivero González	Theoretical study of the generation of molecular hydrogen by microhydrated Al Cluster Cations: The $Al_{17}(+) \cdot (H_2O)_N$ System as an example	Jesús Flores Rodríguez
Pedro Villar Cruces	On the rearrangement of keteneimine oxides and derivatives: A computational study.	Ignacio Pérez Juste
Sara Gil Guerrero	Effects of microsolvation in the Lactim-Lactam tautomerism of 2-Hydroxypyridine/2-Pyridone	Marcos Mandado Alonso, Ángeles Peña Gallego
Pablo S. Piñeiro Guridi	Evaluation of common schemes for the calculations of intermolecular interaction energies	Ignacio Pérez Juste, Marcos Mandado Alonso
Iria Bolaño Losada	Intramolecular proton transfer in ground and excited states of urocanic acid in aqueous solution	Jose Manuel Hermida Ramón
Francisco Riquelme Vázquez	Computational Study of Intramolecular Diels-Alder (IMDA) Reactions	Ignacio Pérez Juste
L. Carlos Vicente Poutás	Reactions of 3-propargylindoles catalyzed by Au(I) in the presence of oxidants: A computational study	Carlos Silva López Olalla Nieto Faza
